DEKA-PermDeck The Ultra Opaque Fabric Paint

Turn your own fashion fantasies into reality on T-shirts, sweatshirts and other clothing. A perfect jeans design - sporty or elegant. The bright shades of DEKA-PermDeck let you exercise creativity! Add variety and colour to linen bags and draperies. DEKA-PermDeck - the ultimate covering fabric paint from DEKA for dark-coloured fabrics. DEKA-PermDeck is ideal for painting and stenciling as well as for printing with stamps and other patterns. Potato stamping with DEKA-PermDeck is especially fun!

Features:

Ultra Deck - soft to the touch - bright clean shades - lightfast - washfast up to 60°C on delicate cycle - creamy texture - blendable ... and waterbased, of course!

Directions:

Stir DEKA-PermDeck well before using. Use only fabrics free of sizing (fabric softener is also a form of sizing!). In order to completely remove sizing DEKA-TextilFit is recommended. Use a piece of cardboard as backing to avoid bleeding to the opposite side (insert between front and back for jeans and shirts). Apply DEKA-PermDeck using a hair or bristle brush. Avoid applying several layers, since this may reduce the paint's washfastness. Lighter pastel shades can be achieved by mixing with Deck White 23-92. It is advisable to test and wash the paint on a sample of the intended fabric, since all fabrics have individual characteristics. Brushes, stencils and other tools should be washed out with cold water immediately after use. Once the painting has dried, iron on the wrong side for approximately 3 minutes at proper setting for the fabric. This process sets the paint. To best maintain the painted surface, we recommend washing at 60°C maximum on delicate cycle using a gentle detergent. Painted jeans should be washed inside out. Accidental spots of DEKA-PermDeck - even if not heatset - are permanent and cannot be removed.

Wonderful fabric projects can be created using any of the paints in the DEKA fabric paint collection together with DEKA-PermDeck. Be aware that each type of paint can only be mixed with other colours of the same type (i. e. DEKA-PermDeck with DEKA-PermDeck, but not DEKA-Permanent with DEKA-PermDeck).

However, the various products in the DEKA fabric paint collection may be used side by side on the same project.

DEKA paints and dyes have represented excellent quality in the hobby and craft field for more than 90 years. The reason this level has been maintained for so long can be attributed directly to intensive laboratory research. Thanks to our international experience and expertise, DEKA paints are always produced utilizing the newest standards in chemical technology. The careful choice of raw materials has allowed us to combine top quality with progressive environmental consciousness. More than 60 years ago, DEKA was considered a forerunner by creating waterbased paints for textiles

DEKA - The specialist in textile and hobby paints!
