PROFESSIONAL  
SPRAY PAINT™

Introducing Liquitex Professional Spray Paint, a stunning innovation developed for professional artists. Combining artist grade pigments with revolutionary water-based technology, Liquitex Professional Spray Paint offers color brilliance, lightfastness and durability in a unique low odor formulation.

### PROFESSIONAL PAINT FOR PROFESSIONAL ARTISTS

Providing the same vibrancy, permanence and performance that Liquitex is known for, Liquitex Professional Spray Paint delivers the high coverage and opacity demanded of spray paint.

### PUSH THE BOUNDARIES

Versatile enough for use on almost any substrate, including canvas, wood, masonry and even glass, Liquitex Professional Spray Paint is fully intermixable with other Liquitex ranges. Used on its own, as a base with Liquitex Heavy Body and Soft Body or for working wet on wet to create a variety of effects, this art will stand the test of time.

## REVOLUTIONARY WATER-BASED TECHNOLOGY

Using innovative water-based technology, Liquitex Professional Spray Paint has the unique benefit of being low odor and does not carry the skin or eye irritant warnings associated with other spray paints. With its ability to be cleaned up with water when wet (permanent when dry), it is ideal for both indoor commissions and for use within an educational environment.

## A COMPREHENSIVE COLOR SYSTEM

Discover the extensive 100 color spectrum which includes transparents, iridescents and fluorescents. 50 colors are matched to core Liquitex Heavy Body and Soft Body colors with additional hues added for a comprehensive offering.

Unlike traditional acrylic paint, which can be mixed to achieve a desired shade, sprays are usually applied directly onto surfaces so black and white have been added to selected colors to create a complete tonal spectrum.

The scale on the back of each can identifies the composition of each color within this spectrum.

A core Liquitex color falls in the middle of the scale

1 - 4 indicates a hue which has had black added to achieve deeper shades of the core Liquitex color

5 - 8 indicates a hue which has had white added to achieve paler shades of the core Liquitex color
